

**Australian Plants Society – S.A. Region, Inc.
Spring Plant Market, Sale 29th October 2022**

NOTICES:

This list of plants is derived from grower information supplied to the Growers Committee of the APS-SA prior to the **2022 Spring Plant Sale**. Due to circumstances beyond the control of the APS-SA, the supply of species and number of plants may not be valid at the commencement of the sale. Also, keenly sought species are depleted rapidly and there is no re-stock capability.

The **2022 Spring Plant Sale** is a departure from the style of previous APS(SA) plant sales. Individual growers will each have their own tables and will be selling their own plants directly to our customers. As a result, prices may vary slightly between the growers, but should still represent good value for money. When purchasing plants, please pay the grower at table that they came from.

Use this list only as a **guide** to what will be available at the sale, accepting the conditions above.

Remember: the early buyer gets the best choices!

("APS #" is the plant number used in APSquery: use "Quick Search|Plant Number Search..." to view plant information.)

Final List: 3529 plants. 27/October/2022
