We offer our sincere thanks to Richard Olley of RSL Care for reading an early draft of our ideas and encouraging us to further develop it. Efforts of Victor Callan and Margaret Johnson who were generous enough to read a pre-submission draft, are equally appreciated. We also extend our thanks to the participants of the Tokyo workshop (January 2013) on D-NDEA organized by Kaoru Tone, as well the workshop participants at the University of Queensland, School of Economics, and the delegates of DEA2013 symposium in Turkey. The timely refereeing process administered by Yasar A. Ozcan, Editor-in-Chief of HCMS is also appreciated.
